Technical Skills

- SQL (PostgreSQL, MySQL)
- Python (pandas, plotly)
- Power BI & Tableau
- Data Cleaning & ETL
- Data Visualization
- React & TypeScript
- Node.js & Express
- Git & GitHub
- Firebase

Currently Learning

- Advanced Analytics
- Machine Learning Basics
- Cloud Engineering

Professional Summary

Data analyst and front-end developer skilled in SQL, Python, and data visualization tools (Power BI, Tableau). Experienced in building dashboards, automating data workflows, and developing responsive web applications. Passionate about leveraging data to drive business decisions and continuously advancing expertise in analytics and machine learning.

Experience

Data Analyst & Developer 2024 – Present

Remote

- Developed interactive dashboards using SQL, Python (pandas, plotly), and other BI tools.
- Cleaned and transformed complex datasets, ensuring data integrity for business insights.
- Built web applications with React and Firebase to automate data workflows.
- Explored predictive analytics to enhance client deliverables.

Full-Stack Developer 2023 – Present

Personal Projects

- Developed portfolio websites using React, TypeScript, and Firebase with responsive designs.
- Integrated REST APIs for dynamic content and optimized UI/UX for user engagement.

Education

BSc Mathematics 2024 – Expected 2028

University of Lagos, Nigeria

- Coursework: Linear Algebra, Probability, Statistics, Calculus.
- Completed online certifications in SQL, Python, Data Visualization, and React.
